Introduction

Student Users

In our registration system, student users will have total access to the system; however, they will not possess the same capabilities as faculty users or administrator users. Within the registration system at XYZ University, students will be able to register for courses necessary to completion of their degree. These courses will be given/offered at specific times, according to the administrator. Under every course, students will be able to view particular details including the section, timeslot, semester, faculty ID, room number, seats available/remaining, credit, and the designated professor. Other abilities optional to the student include major and minor changes if the student wishes to no longer continue their current major. Options include adding a major (double major), adding a minor, or changing majors. When registering for classes, students will be able to register as early as they wish, granted the administrator opens the registration system to those students. This capability prevents students from being restricted from registering for a class due to max capacity. Finally, students also have the ability to withdraw or drop a course during the specified time window.

Faculty Users

Faculty users include professors of XYZ university and any other staff relevant to the university. Faculty users are given the ability to access and modify course schedules assigned to them, student schedules, assignment of grades, viewing of grades, and viewing class information (student list). These users include professors, but at the same time, some professors may also be advisors. In this case these users have the ability to request course changes for students, through the administrator. All other basic permissions including viewing the offered courses, academic calendar, majors, minors, and department and building information are granted to faculty users.

Visitor Users

Visitor users are given access to the registration system with certain restrictions. These include not being able to attempt to register for classes and not having access to or the ability to view private class information (professor teaching the class, timeslot, days, etc.) Therefore, visitor users may simply view the offered courses, academic calendar, majors, minors, and department and building information. Beyond these exceptions, visitor users will not be given further capabilities.

Researcher Users

Researcher users are given similar permissions as visitors, but with a slightly larger scope of information. Information regarding students and their performance is accessible by researchers, viewable by categories such as undergraduate / graduate students, majors & minors, and grade/year. Some performance statistics include student population, grade averages, pass/fail rate, class size, attendance rate, and more.

Administrator Users

Administrators are responsible for the inner workings of the XYZ registration system. These individuals have the ability to create/remove/edit courses/classes, include/remove holds, changing of grades, changing/adding/removing of majors/minors, editing class size, class capacity, class building/room number, specified professor, editing the master schedule, recovering login information, and more. Administrator users possess the most control over the registration system.

ACADEMIC CALENDAR

Users are presented with this homepage when accessing the website of XYZ University. There is a link on the top right of the page allowing users to log into the system with proper credentials. Once a student, faculty, researcher, or admin user enters their credentials, they will be given further access. Users must access the login page to view the other links including Courses, Calendar, Majors/Minors, and Department/Building.

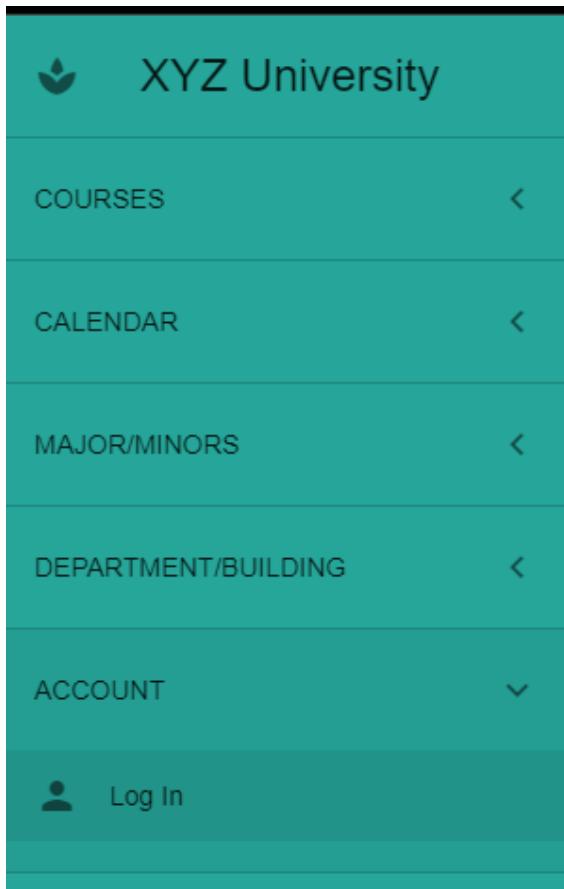

Visitor Use Case

Upon entering the website, visitor users will be presented with the homepage shown above. Upon clicking Academic Calendar or Login, they will be redirected to a page with the option to view Courses, Calendar, Major/Minors, Department/Building, and Account.

Visitor users can access the links Courses, Calendar, Majors/Minors, Department/Building, & Account at this page.

The screenshot shows the XYZ University homepage. On the left, there is a vertical navigation bar with the following items: COURSES, CALENDAR, MAJOR/MINORS, DEPARTMENT/BUILDING, and ACCOUNT. The ACCOUNT item has a dropdown arrow icon. Below the navigation bar, there is a "Log In" button. The main content area features a dark blue polygonal background with the text "XYZ University" in white. Overlaid on the right side is a "Log In" form. The form includes fields for "Username" and "Password", a "Forgot Password?" link, and a "LOGIN" button. The overall design is clean and modern.

Home Page Links

Users can access the courses, master schedule for the current and previous semesters, majors and minors offered, department and building information, and another link to log in.

Courses

The screenshot shows the XYZ University website's Courses page. On the left, there is a vertical navigation menu with a teal background. The menu items include 'XYZ University' (with a logo), 'COURSES' (selected), 'Courses', 'Master Schedule', 'CALENDAR', 'MAJOR/MINORS', 'DEPARTMENT/BUILDING', and 'ACCOUNT'. The main content area has a white background. At the top, it says 'Courses' and has a search bar with placeholder text 'Enter search term'. Below the search bar is a table with course data. The table has columns: Course ID, Course Name, Course Credits, Department, and Prerequisites. The table lists seven courses from 2001 to 2007. Each row includes a 'Check Prerequisites' link. At the bottom of the table, there are pagination controls: 'Show 10 entries', 'Showing 1 to 10 of 225 entries', and arrows for navigating through the pages.

------	-------------------------	---------	--------------	---	------	----	----------	----------	----	---------------

Students will not be able to register for a course if a time conflict exists with another class they are currently registered in, or a class they are trying to register for simultaneously. This time conflict appears if two different courses' start times & end times overlap, on the same day. The "ADD" button will not be present, and will be substituted with "Time Conflict" highlighted in red. In this case, Lyndsay Bellwood is registered for The American People 1 which takes place on Monday & Wednesday, from 12 PM to 12:50 PM. Attempting to add

History of U.S. Culture which has the same time slot presents a time conflict, thus is not available to add.
